

FRESHMAN ADVISORY

The intent of the Freshman Advisory is to review student work during the first two semesters and to provide guidance regarding the selection of and success within a particular degree program. The Freshman Advisory also serves as a precursor to the Sophomore Barrier, which must be passed in order to progress toward a chosen music degree.

The Freshman Advisory is comprised of the instructors of Introduction to Music Technology, Introduction to Music History, Music Theory, and Applied Lessons (including Class Piano when applicable) as well as the student's assigned faculty advisor. Additional faculty may also contribute to the Freshmen Advisory.
